

## COMMUNITY MEETING: 09

Date: 13th January, 2018

Time: 1:00 pm

Place: Korail

Participant=20

**Subject: Tapping Tacit Knowledge on Innovation**

❖ **Agenda**

- i) Knocking the Community to share their Implicit/Inherent Knowledge of Innovation

❖ **Description:**

The DEPP Lab Bd. team conducted community meeting with about 20 Participants with Korail Community on 13th January, 2018. The DEPP Lab team tried to make understand to the community about the innovation they are doing inherently but they are not aware of it.

This can be seen as involving four key dimensions:

- Capturing data, information and knowledge
- Storing data, information and knowledge
- Effective communication and sharing of knowledge
- Use and application of knowledge

These dimensions must be supported by:

- A culture that supports and encourages good knowledge management practices
- External focus and innovation to foster the creation of new knowledge and application of knowledge to improvement of processes and practices

❖ **Attendance Sheet**
